Available in various shapes and sizes, they offer easy installation and long-lasting performance in both residential and commercial spaces.

## Product Catalogue

### 1. TPS-1 – Wall Seal

**Wall Seal for wall-mounted glass systems**, Taiton **Wall seal** offers airtight and moisture resistance. It ensures clean, professional installations and improved energy efficiency.

**Benefit:** Prevents air and water leakage for better insulation.

**Feature:** Airtight and water-resistant wall-end sealing.

**Ideal for:** Interior contractors, office partition installers, modular cabin makers.

### 2. TPS-2 – Central Seal

Creates a secure, airtight barrier at the central join of equipment or surfaces. Taiton central seal ensures leak-proof sealing in packaging and machinery applications.

**Benefit:** Maintains product safety and packaging integrity.

**Feature:** Central-positioned sealing with strong adhesion.

**Ideal for** : Packaging equipment manufacturers, factory engineers, automation companies.

### 3. TPS-3 – Middle Seal

Provides a strong and durable seal between components or panels. Built for tough

industrial conditions and heavy-duty performance.

**Benefit:** Withstands pressure, dust, and vibration effectively.

**Feature:** Reinforced mid-joint sealing for industrial use.

**Ideal for :** Equipment manufacturers, heavy machinery engineers, industrial service providers.

#### 4. **TPS-4 – Soft D Seal**

A flexible, **soft-profile seal** ideal for moving glass doors or glass frames. Compresses gently to provide a consistent seal in dynamic areas.

**Benefit:** Smooth **glass door and glass frames sealing** for air sealing and low vibrations.

**Feature:** D-shaped soft rubber for flexibility and snug fit.

**Ideal for :** Door manufacturers, office partition fitters, modular furniture designers.

#### 5. **TPS-7 – Bottom Seal**

**Bottom Seal for door bottoms.** It ensures the blocking of the dust, air, and water intrusion. Perfect for sealing the lower door gap and improving comfort indoors.

**Benefit:** Aesthetically shields interiors from external elements.

**Feature:** Weather-resistant bottom-edge sealing profile.

**Ideal for :** Door fabricators, enclosure builders, residential hardware dealers.

#### 6. **TPS-9 – Offset Lip Seal**

**Seal to handle glass misalignments** between surfaces. The offset lip compensates for uneven edges and prevents leaks effectively.

**Benefit:** Saves rework on imperfect or retrofitted installations.

**Feature:** Lip design for gap-bridging and alignment adjustment.

**Ideal For :** Maintenance teams, retrofit specialists, industrial equipment assemblers.

#### **7. TPS-M1 – 180° Magnetic Seal**

**Seal for straight glass-to-glass door** setups with a 180° connection. Uses strong magnetic force to ensure firm, clean closure.

**Benefit:** Delivers frameless style with leak-proof sealing.

**Feature:** Magnetic strip seal for 180° glass door contact.

**Ideal for -:** Bathroom glass door suppliers, luxury shower cabin makers, architectural designers.

# Spider Fittings Glass Hardware

Taiton's **spider glass fittings** offer strong and reliable **support for frameless glass facades**, creating a clean and modern look. Made from high-grade stainless steel, these fittings provide excellent durability, weather resistance, and stability. Perfect for exterior and interior applications, they allow large glass panels to be fixed securely without compromising on style. Choose Taiton for precision-engineered spider fittings that combine safety, performance, and a smooth finish .

## Product Catalogue

### 1. Spider Fitting with Fin Glass Hardware

**Spider fittings** give strong support to tall glass walls. The **fin glass** helps handle wind and weight better.

#### Features

Designed for wall-mounted glass systems, it provides an airtight, moisture-resistant seal.

#### Benefits

Helps improve energy efficiency and protects the structure from moisture damage.

**Ideal for** : Ideal for interior designers and contractors working with glass partitions in offices or modern homes

### 2. Spider Fitting without Fin (200 mm)

**Spider Fitting without Fin** for small glass panels. It provides a distinctive neat look and takes up less space.

#### Features

Central placement design that creates a tight and consistent seal in packaging machinery.

#### Benefits

Ensures safe and leak-proof packaging, reducing product loss during transport.

#### Ideal for

Packaging manufacturers and industrial automation firms.

### 3. Spider Fitting without Fin (220 mm)

**220mm spider fitting without fin** gives extra support for heavier glass without affecting the look.

**Feature:** Designed to support heavier glass panels with a wider arm span of a **220 mm spider fitting**.

**Benefit:** Provides added strength without compromising the clean appearance of the structure

**Ideal for :** Ideal for architects and contractors working on high-load frameless glass installations.

### 4. Splice Plates Glass Hardware

**Splice Plates Glass Hardware** connects glass fins safely. Keeps everything straight and strong.

**Feature:** Joins glass fins securely while maintaining alignment.

**Benefit:** Enhances structural integrity and ensures a neat, aligned finish

**Ideal for :** Suitable for builders and engineers designing large glass facades or curtain walls

### 5. Fin Plates Glass Hardware

**Fin Plates** hold the glass fins firmly in place. Helps the structure stay stable and secure.

**Feature:** Firmly anchors glass fins to supporting structures.

**Benefit:** Adds stability and prevents movement, ensuring long-term safety.

**Ideal for :** Best for structural glazing specialists working on commercial or high-rise projects

### 6. Spider Bolts Glass Hardware

**Spider Bolts** Fixes the glass tightly to the spider fitting. Keeps the glass safe and steady.

**Feature:** Firmly anchors glass fins to supporting structures.

**Benefit:** Adds stability and prevents movement, ensuring long-term safety.

**Ideal for :** Best for structural glazing specialists working on commercial or high-rise projects

### 7. Glass Canopy Fittings

Glass canopy fittings supports glass roofs or shades. Strong and safe, with a clean finish

**Feature:** Engineered to hold glass roofs or awnings securely in place.

**Benefit:** Offers weather resistance with a sleek, minimal finish.

**Ideal for :** Designed for developers and designers building entrance canopies or skylights

## Product Catalogue

### 1. Overhead Door Closer

This door closer is fixed at the top and helps close the door smoothly and safely. It is strong, easy to install, and perfect for daily use.

**Features:** Mounted on top of the door, made with strong materials for daily use. Easy to install and supports smooth closing.

**Benefits:** Closes doors gently and safely, preventing slams and damage. Reliable for long-term use in busy spaces.

**Ideal for:** Ideal for offices, schools, hospitals, and commercial buildings

### 2. Concealed Door Closer

This door closer is hidden inside the door for a clean look. It works quietly and keeps the door closing smooth and secure

**Features:** Fitted inside the door for a hidden finish. Works quietly and supports secure door closing.

**Benefits:** Maintains a clean and modern look while ensuring smooth movement. Great for places that need both style and safety.

**Ideal for:** Best for luxury homes, hotels, and premium office interiors

# Sliding door system

Our sliding door system is designed to make glass doors move smoothly and quietly. It is ideal for homes, offices, and commercial spaces. The system is made with high-quality stainless steel for long-lasting use. It supports both single and double glass door setups. The sliding track is strong and keeps the door stable while moving. It gives a clean and modern look to any space. The fittings are easy to install and maintain. The rollers glide effortlessly, making the door feel light and easy to open. It also helps save space as it doesn't need a swinging area. The design is compact and blends well with glass interiors. Our system is tested for safety and durability. It adds style while keeping the function smooth and reliable. Choose Taiton's sliding door system for smart and elegant door solutions.

## Configurations / Product Catalogue

In taiton Telescopic and Synchro are two types of sliding systems. Each one works in a different way to move and arrange the door panels.

1] **Telescopic sliding system** - this door system uses multiple sliding panels that stack neatly behind one another, allowing for wider openings with minimal space usage. It is ideal for maximizing access in commercial or modern residential spaces while maintaining a smooth, efficient design

2] **The Synchro Sliding Door System**- this door system allows two doors to open and close simultaneously with a single push, offering smooth and synchronized movement. It is ideal for wide openings, enhancing both functionality and space efficiency

# Telescopic sliding system

The Telescopic Sliding System is designed for wider openings where a standard sliding door isn't enough. It uses multiple panels that slide together smoothly in sequence. When one panel is pulled, the others follow, sliding into place neatly. This setup helps save space and gives a clean, modern look. It's ideal for commercial spaces, conference rooms, and large entrances. The system ensures smooth movement with minimal effort. Strong build and sleek design make it both functional and stylish.

## Find What you Need

### 1] 1+0 Sliding System

This system comes with one sliding panel and no fixed panel. It's a minimal and straightforward design for compact openings.

**Benefit:** Space-saving and easy to install.

**Feature:** Single-panel movement.

**Ideal for:** Small offices, shops, and residential units

**Size** - 950mm (Width) x 3000mm (Height) per panel, ideal for standard and large openings.

**Max Weight Capacity** – Supports up to 60 KG (Normal) / 80 KG (HD)

### 2] 1+1 Sliding System

Includes one sliding panel alongside a fixed panel for stable movement. Designed for smooth and controlled sliding functionality.

**Benefit:** Balanced sliding with simple operation.

**Feature:** One fixed + one sliding panel.

**Ideal for:** Homes, balconies, and retail spaces

**Size** - Frontal view a 16 mm visible slide

### 3] 2+0 Sliding System

Features two sliding panels without any fixed section. Allows wider openings for better access and ventilation.

**Benefit:** Full opening flexibility.

**Feature:** Dual sliding functionality.

**Ideal for:** Modern homes, conference rooms

**Size** - Frontal view a 16 mm visible slide

#### 4] **2+1 Sliding System**

Combines two sliding panels with a fixed one for added strength. Offers extended access with extra support.

**Benefit:** Improved support with wide access.

**Feature:** Two sliding, one fixed panel.

**Ideal for:** Restaurants, showrooms, office partitions

**Size** - Frontal view a 16 mm visible slide

#### 5] **3+0 Sliding System**

Designed with three sliding panels for maximum opening space. Ideal for larger spaces that demand full-width access.

**Benefit:** Covers wide openings with ease.

**Feature:** Triple sliding panel design.

**Ideal for:** Commercial buildings, luxury homes

**Size** - Frontal view a 16 mm visible slide

#### 6] **3+1 Sliding System**

Comes with three sliding panels and one fixed panel. Provides better stability and operational flow.

**Benefit:** Enhanced stability for wide setups.

**Feature:** 3 sliding + 1 fixed configuration.

**Ideal for:** Villas, resorts, event spaces

**Size** - Frontal view a 16 mm visible slide

#### 7] **4+0 Sliding System**

Includes four sliding panels for uninterrupted large openings. Perfect when you need to completely open up a space.

**Benefit:** Maximized open area.

**Feature:** Four sliding panels.

**Ideal for:** Large halls, lobbies, exhibition centers

**Max Panel Dimensions** – 950mm (Width) x 3000mm (Height) per panel.

#### 8] 4+1 Sliding System

Consists of four sliding panels with one fixed panel for support. Ensures stability while offering expansive access.

**Benefit:** Balanced strength and spacious design.

**Feature:** Four sliding + one fixed panel.

**Ideal for:** Malls, high-end residences, hotels

**Max Panel Dimensions** – 950mm (Width) x 3000mm (Height)

## Synchro Sliding System

Taiton's Synchro Sliding system is designed to make sliding two doors smooth and effortless. When you slide one door, the other door moves along with it automatically. This helps in opening or closing both doors at the same time with just one push or pull. It is perfect for wide glass door openings, giving a clean and modern look while saving space. The system is strong, reliable, and easy to use. It works quietly and is ideal for both homes and commercial spaces. Made with high-quality materials, it ensures long-lasting performance. The installation process is simple and requires minimal maintenance. It adds both style and functionality to any interior.

### Product Catalogue

### 1] **2+0 SYNCHRO Sliding System**

This system has 2 sliding panels that move together smoothly. It's ideal for small openings and easy access.

**Benefit:** Offers smooth dual-panel movement for smaller areas.

**Feature:** Two synchronized sliding panels.

All 6 panels slide from one side for a full opening. Suitable for extra-large areas needing full access.

**Benefit:** Maximizes open space with synchronized panel movement.

**Feature:** All six panels slide from one side.

**Ideal for:** Airports, large retail fronts, exhibition spaces

**Size - 16mm**

## 6] 6+2 SYNCHRO Sliding System

Six panels slide from one side, and two from the other. Designed for very wide spaces and smooth movement.

**Benefit:** Delivers unmatched flexibility and smooth operation.

**Feature:** Six sliding panels on one side, two on the opposite.

**Ideal for:** Convention centers, malls, grand entryways

**Size - 16mm**

# Luxury Shower Cubicles

Taiton's luxury shower cubicles are designed to bring comfort and style to your bathroom. They are made with high-quality glass that is strong, safe, and easy to clean. The cubicles have smooth sliding or swing doors that open and close with ease. Each design adds a modern and clean look to any bathroom space. The fittings are rust-proof and long-lasting, making them a smart choice for daily use. Taiton uses top-quality hinges, handles, and seals to give a perfect finish. The cubicles are available in different sizes to fit both small and large bathrooms. They also help keep the rest of your bathroom dry by preventing water splashes. Installation is quick and easy with professional support. Taiton's shower cubicles are built for comfort, quality, and a touch of everyday luxury.

# Office Partitions

Create smart, organized, and professional workspaces with our high-quality office partitions. At Taiton, we offer modern partition solutions that help divide office areas without the need for permanent walls. Our partitions are designed to give your space a clean look while maintaining privacy and comfort for your team. Whether you need glass partitions for a bright, open feel or solid partitions for more privacy, we have the right options for your office. Easy to install and made with strong materials, our partitions are perfect for meeting rooms, cabins, and open-plan

layouts. Choose Taiton office partitions to make your workplace more functional, stylish, and efficient.

## Products Catalogue

### 1] Tavic 25mmx25mm SG

A sleek and durable aluminum section designed for creating modular office spaces. It measures 45mm in width and 25mm in depth, offering a strong structural profile suitable for supporting glass or panel inserts, with a smooth surface finish ideal for professional interior.

**Benefit:** Ideal for modern, minimal office designs that need reliable framing.

**Feature:** 45mm x 25mm aluminum profile with clean finish.

**Ideal for:** Office partition manufacturers, interior contractors, co-working space designers.

Standard Section 25mm x 25mm

Suitable for 8mm/10mm/12mm toughened glass

Partition height can be offered up to 3000mm

### 2] Tavic 45mmx25mm SG

A compact square aluminum section used in office partition systems, especially for framing or support where a slimmer profile is required. It offers a clean, minimal look while maintaining adequate strength for lightweight panels or glass integration.

**Benefit:** Delivers a neat, understated appearance without sacrificing function.

**Feature:** Slim 45mm x 25mm profile suitable for lightweight partitions.

**Ideal for:** Designers of compact offices, startups, minimal workspace planners.

Standard Section 45mm x 25mm

Suitable for 8mm/10mm/12mm toughened glass

Partition height can be offered up to 3000mm

### 3] Tavic 75mmx25mm SG

A rectangular aluminum profile designed for office partitions that require a broader frame for added strength and visual impact. Measuring 75mm in width and 25mm in depth, it provides a sturdy base ideal for larger glass panels or composite partitions, combining durability with a streamlined appearance.

**Benefit:** Adds structural support and visual boldness to partition systems.

**Feature:** 75mm x 25mm durable frame for larger panels.

**Ideal for:** Corporate interior designers, architectural firms, premium office developers.

Standard section: 75mm x 25mm

Suitable for 8mm / 10mm / 12mm toughened glass

It can accommodate flush door of 35mm or 45mm

Partition height can be offered up to 3000mm

#### 4] Tavic 100 SG

A heavy-duty aluminum section typically used as a main support or base channel in office partition systems. With a width of 100mm, it offers superior strength and stability, making it ideal for anchoring full-height glass panels or double-glazed units in high-traffic commercial spaces.

**Benefit:** Ensures stability and safety in high-use environments.

**Feature:** 100mm wide heavy-duty profile for primary structural use.

**Ideal for:** Commercial builders, office space contractors, infrastructure consultants.

Demountables glass partition, 100mm thick

Maximum height: 3000mm

#### 5] Tavic 100 DG

A robust aluminum profile designed specifically for double-glazed (DG) office partition systems. With a 100mm wide section, it provides ample space to accommodate two layers of glass with an air gap in between, ensuring enhanced sound insulation and structural stability in modern office setups.

**Benefit:** Enhances acoustic performance and visual separation.

**Feature:** 100mm profile suitable for double-glazed partitions.

**Ideal for:** Sound-sensitive workspaces, executive suites, acoustic-focused architects.

Demountables glass partition, 100mm thick

Maximum height: 3000mm (depending on elevations)

#### 6] Tavic SC60 Stile Door

A slim-profile aluminum door frame designed for office partitions, offering a sleek and modern look with sturdy performance. With a 60mm stile width, it provides the perfect balance between minimal design and structural strength, making it ideal for single-glass or panel doors in commercial interiors.

**Benefit:** Achieves a refined door frame appearance without compromising strength.

**Feature:** 60mm stile for slim yet strong framing.

**Ideal for:** Office door fabricators, glass contractors, commercial interior designers.

#### 7] Tavic SD75 Stile Door

A heavy-duty aluminum door frame with a 75mm stile width, designed for areas requiring enhanced durability and a more prominent frame appearance. Its robust construction makes it suitable for high-traffic office spaces, supporting glass or panel inserts while maintaining a professional, modern finish.

**Benefit:** Provides a bolder frame with extra durability for demanding use.

**Feature:** 75mm stile for reinforced, high-traffic door systems.

**Ideal for:** Business parks, corporate offices, institutional interiors
